What will my daily percentage be?

Daily percentage is up to 30%

This depends on eating habits, the time of day you re-roast

or deposit and TVL fluctuation. Average daily return is 10-30%

Why isn't my reward growing?

The frequency with which you withdraw your earnings is habitually affecting the reward, and if you withdraw too many times, the daily percentage will drop. If you just deposit from a small amount it will take time to show up on the dApp. With only 3 decimal places, daily increases in TVL may result in lower daily percentages.

What happens if I keep withdrawing my earnings? If you always eat your daily percentage will drop dramatically and will not receive the highest daily returns. This is the anti-whale mechanism that preventing a whale draining the TVL

No, the purpose of the contract is to provide the best possible entry

The contract has an in-built anti-whale mechanism.

This works as follows; User 1 re-roast 6:1 gets highest daily percentage in that 24 hour period. User 2 does 5:2 gets a lower percentage. User 3 does 4:3 gets lower percentage again. This happens all the way until the user who eats continually rewards will drop to 0.5% per 24 hour period. This is to prevent 1 user draining the TVL, creating sustainability
